

# Haifa SOP Bio

## Water-soluble potassium sulphate also for organic cultivation

Haifa SOP Bio is a new potassium-based water-soluble fertilizer, intended for common crops and organic crops. This new fertilizer has a high available potassium content. Potassium is an important mineral for the quality, firmness and storage life for all kinds of crops. Besides potassium, Haifa SOP Bio also has a high sulphur content. This makes plants stronger and more resistant.

### Properties of Haifa SOP Bio

- Permitted for use in organic agriculture and horticulture in accordance with Directives (EC)834/2007 and (EC)889/2008, appendix 1
- Water-soluble
- High potassium and sulphate content
- Can be used for all crops
- Can be mixed with the most common fertilizers, except calcium-based fertilizers

### Benefits

- Pure, highly concentrated potassium- and sulphate fertilizer
- Water-soluble
- Can be used as an irrigation fertilizer and as foliar fertilizer
- Increases the dry matter content
- Increases the natural resistance of plants

## Composition of Haifa SOP Bio

Elements	Haifa SOP Bio
