

Get the Extra Yield

Almond Feed™ for better crops

- Based on potassium nitrate
- Cost effective compared to K-T*
- 100% plant nutrients, and fully soluble
- Prevents salinity build up, and improves water use efficiency
- Ideal for highly efficient applications by Nutrigation™ (fertigation), superior yields with micro fan jet application.

“The inclusion of KN (potassium nitrate) as a proportion of the fertilizer did result in numerically **superior yield in all cases**”

Obtained by applying potassium nitrate based fertilizer through fanjet irrigation system
A conclusion of a three years research done by Dr. Patrick Brown, UC Davis, 2014

* K-T - potassium thiosulfate
